Logistics Mission

Create a cost-effective, service sensitive, modern logistics and transportation network through industry standard systems integration and the implementation of world class operating standards. This network must fully support and evolve as the new plant operating and delivery network changes, all in support of the Delivering for America program.

Supporting *Delivering for America*

The Transportation and Logistics group is tasked with leading the strategic design of a world-class transportation network and developing cost- and service-enhancing processes to enable optimization and execution through Postal Service plants and delivery operations. This will be accomplished by:

- Lead the redesign of the surface transportation network
- Reduce air transport
- Improve carrier management and
- Deploy a state-of-art logistics platform

FY23 Q1 Planning: Air and Surface

- Focusing on service responsive transportation
 - Maximizing air and surface modes holistically
 - Diverting air to surface where feasible
- Utilizing technology for improved visibility and management
 - Four Kites, CLEAR, Freight Auction, etc.
- Advancing volumes to keep facilities fluid
 - Advancing to carriers
 - Advancing to destinating processing facilities
